

CASTLE OFFICE MOVES PROJECT PROFILE

Project: Woolworths HQ Office Move
Location: London
Staff Number: 1650

Project Description:

Castle Office were the removals contractor for the refurbishment project of the Woolworths HQ building in London.

This was one of the most complex projects we have been involved in. It was important to Woolworths that their Head office stayed live while the refurbishment took place.

A local site was selected as a temporary office, floor by floor the move cycle swung into action. The staff were moved off site while their floor was refurbed, once completed the staff were returned and the next floor emptied. The entire project lasted 12 months and involved the movement of 1650 staff.
